

The Center for Gifted ~ Midwest Torrance Center for Creativity presents...

Winter Wonders in Addison

Creative Computer Adventures for Early Learners

Saturdays, February 17, March 10, and/or April 14 | 12:30-1:30 p.m. | Ages 3½ to 6
Tuition: \$20/ session + \$2.50 lab fee

Do you wonder what are worthwhile computer games for your young child? Or how to teach them computer skills? Benefit from the expertise of an experienced teacher who will introduce your child to the best games her children played, games that not only enhanced their creativity and learning at the time, but, as she has discovered, taught them skills that have proved beneficial in junior high and high school.

Tucked into the fun of playing computer games, these young children will also learn correct terminology and such computer skills as when to right click and when to left click, how to plug in a USB cord, how to log in, and (very important) how to exit and shut down a computer properly – using the mouse, not just pushing the power button – so no damage is done to the computer or the files on it.

Questions about this new class? Please email the instructor, Vickie Kiamco, at vkiamco@gmail.com.

STEM with STEAM 1:45-4:15 p.m. | Grades 1-6 | Tuition: \$45/session + \$5 lab fee

February 17

March 10

April 14

Moto-Pets and Vibrobots:

Design and engineer your own battery-powered motorized pets. Create vibrobots, bristlebots, and artbots in this creative class. Let your ingenuity take shape!

“March Madness” Basketball Launcher:

Engineer and build a mini basketball launcher to propel a ping pong ball into a basket, bucket, or cup! Test and experiment with your design for greater distance and accuracy.

Create a LEGO Movie!

Using a digital camera, movie software, and Lego robots, create a stop-action movie. Experiment with special effects, sound, and titles. Share your movie with family and friends!

LifeStorage Conference Room 426 S. Westgate St., Addison
