

Halloween Shenanigans!

Programs designed for bright, motivated students seeking new challenges and fresh inspiration.
Fall 2019 One-Day Weekend Programs in Glenview and Elmhurst

Dry Ice Classes:

Most science experiments are educational at least and exciting at best, but add a bit of dry ice to the mix and the excitement and discovery goes off the charts! Join us for hands-on experiments as you explore the amazing chemistry and vast scientific application of that prodigious little body of gas—the bubble.

Boo Blood and Fake Blood Classes:

Trying to achieve the perfect shade and consistency of fake blood this Halloween? Join us for some serious fun! Explore the properties of the type of blood you're faking and the ingredients you can use to imitate them. Real blood is thick, but not too thick, and it's not always red. Can you reproduce its many creepy phase changes? Will your fake blood have that real-blood feel? Experiment with tried and true blood recipes, or create your own.

Boo Bubble Classes:

How are perfect fog-filled bubbles created? Play with purpose to discover the science behind them as you create, hold, poke, and bounce your own bubbles. Watch how the fog escapes when your bubbles burst, then create more!
