

2019 Summer Wonders in Glenview - Grades 1-5

INNOVATION CREATION LAB!

What inspires you to create? Do you like to construct, build, design, hammer, draw, paint, or create stories or animations? Do you like science, art, robotics or coding?

Explore a variety of activities, builds, and creations under the tutelage and practical guidance of expert, creative teachers in student-centered classrooms.

Your imagination will relish in the abundance of materials and resources and the ideas and possibilities they inspire. Thrive in the freedom to discover, explore, and experiment!

Depending on the length and scope of their activities, some students will remain in the same classrooms all morning or afternoon, while others will rotate to different rooms. Our faculty will ensure that all student activity is progressive and that learning--whether from mistakes or successes--is taking place!
