

# Free Parent Seminar!

## *How Identifying Strengths and Weaknesses in Gifted Children Serves to Distinguish and Support their Learning Styles*

*provided by: Cheryl Lind, M.S., Ed.S. Certified School Psychologist*

Are you ever perplexed that your child seems so amazing at some things and not at others? Learn to identify different types of giftedness and learning styles. Discover how they influence children's behavior at home and at school as well as how they respond as learners. Does your child seem highly motivated in some ways and not in others? Using Richard Lavoie's theories of motivation, among others, identify your child's motivational style. Is your child seeking power or prestige? looking to satisfy his or her voracious curiosity? to improve social or educational status? What is your own motivational style? Is it compatible with your child's or in conflict with it? Identify your own and your child's personality styles. Are they compatible or in conflict? With a better understanding of these issues, you can create smoother relationships and less strife at home and at school. An open parent discussion format will follow the presentation.

## Science Spectacular!

Click [HERE](#) to Enroll Online

### **Grades K-3** (*chemistry immersion*)

#### **Powders, Potions and Polymers:**

Concoct creative scientific solutions, cause weird chemical reactions, and create slippery substances. Explore the fascinating world of chemistry!

### **Grades 4-8** (*attend two classes*)

#### **Combustion and Pyrotechnics:**

Investigate thermochemistry through experiments with chemical combinations and physical forces that tend to flare, fizzle, spark, and even explode!

#### **March Madness Basketball Launcher:**

Engineer and build a mini basketball launcher to propel a ping pong ball into a basket, bucket, or cup! Test and experiment with your design for greater distance and accuracy.

Both events run simultaneously on Saturday, March 17, 2018 from 1:30-4:00 p.m.

Oak Grove School  
1700 O'Plaine Rd., Libertyville

The Parent Seminar is offered free of charge. Tuition for the *Science Spectacular!* is \$45.
