School & Community Assistance for Recycling and Composting Education

Monday, November 19

The 3R's and Paper-Making:

Get excited about solutions to combat our garbage problem through an energetic, interactive show-and-tell presentation about recycled and reused products. Gain an understanding of the importance of, and differences between, Reduce, Reuse, and Recycle. Following the presentation, discover how recycled-content paper is made, through an exciting hands-on activity that mimics the process of industrial recycled paper-making, using only human energy. Acquire new vocabulary, such as *hydro-pulping* and *slurry*. Make your own recycled paper sample to take home!

SCARCE is an award-winning environmental education non-profit dedicated to creating sustainable communities. We accomplish this through innovative and hands-on education programs for schools and organizations, demonstrating care for our natural resources through our Book Rescue, and engaging the broader public through community-wide events and programs.

SCARCE
