AM, PM, and Full Day Options ● Before and After Care

Igniting Imaginations Since 1983!

It is the policy of The Center for Gifted not to discriminate on the basis of race, color, gender, religion, or national or ethnic origin in matters of admissions or services relating to its programs.
STEAM Week - Grades 3-6

July 13-17

Science, technology, engineering, math: Where do your interests lie? Come explore your passions, or join in learning about some of ours.

Domino Effect (Afternoon)
Maze Game Design with Power Point (Afternoon)

Build It, Write It, Do It! - Grades 3-6

July 20-24

With tons of supplies and equipment at your fingertips, what will you be inspired to create? Delve deep into your favorite kinds of projects and activities, or explore something new!

Platform 9¾: Calling all witches and wizards! You have been accepted into the Hogwarts School of Witchcraft and Wizardry. Before you take your O.W.L.s, join us to learn a few more potions and enjoy a mug of Butterbeer. Compete in Harry Potter trivia, play Quidditch, and create your own wand. (Afternoon)

Creative Writing: Originate ideas, create characters, design plots, and express yourself through writing stories and poems. Share your creativity through writing - in whichever genres suit your style. (Afternoon)

Maker’s Mania - Grades 3-6

July 27-31

Explore your interest, collaborate with a partner, share ideas with new friends, as you create and bring your ideas to fruition.

Math Sculptures: Celebrate mathematics with sculpture, and sculpture with mathematics, as you create your own artistic masterpieces. (Afternoon)

Amusement Park Physics: Why do you get the “butterfly” sensation when a roller coaster plunges you downward? It’s all in the way Newton’s Laws of Motion collide with your adrenaline. What happens when rides get stuck? How do they slow down? Physics plays an essential role in the exhilarating rides at amusement parks. Discover how inertia, kinetic and potential energy, mass, and centripetal and centrifugal forces influence your carnival experiences. Experiment with time, distance, and speed. Design and construct your own ride! (Afternoon)

Program Details

Location
Elmhurst College
190 S Prospect Ave, Elmhurst

Hours
Full Day: 9:00-3:00
Morning: 9:00-11:40
